Objective

I am a recent college graduate with a passion for web development and design. I have learned a lot from my education and personal projects, but am eager to work and continue my learning in a professional setting.

Experience

FREELANCE WEB DEVELOPER – ADVANCED SKIN INSTITUTE

I currently maintain, manage, and make regular updates for a dermatology clinic's web site. Working on this site has taught me a lot about how to work from existing code, rather than always coding everything from scratch.

FREELANCE WEB DEVELOPER – MUEBLERIA AYUTLA FURNITURE

I also manage a website that I made for a furniture company, Muebleria Ayutla, in Los Angeles. This project taught me a lot about how to communicate with customers who might not be familiar with web technologies, and still provide them with a product they are happy with.

PERSONAL PROJECT – SHREDJOURNAL

Shredjournal is a surf journal web application that I made from scratch in PHP. Making this application taught me a lot about web security, and how to use an API to start making more sophisticated applications.

PERSONAL PROJECT – PORTFOLIO

My online portfolio, www.kyjoconn.com, has some more of my projects and information about me. This was my first introduction to Bootstrap, so I had fun experimenting and learning about Bootstrap and all of its cool features.

Education

University of California Santa Cruz, BA in Computer Science

Skills

HTML - CSS - Javascript - PHP - Python - Web2py - SQL - JAVA - C - Git - Bootstrap - Unity - Unix - Photoshop
